Conventions

National Bank of Bahrain Health Center at Dair re-opened in October 2005 with some new added services. For more details, please refer to Primary Health Care chapter "Primary Health Care Summary".

Table 6.1

MMR1: A shift of Measles vaccine for Infant from the age of 9 months to age 1 year since 1999.

Table 6.4

Percentage Coverage of TT will normally be decreased by time as most of the pregnant women were immuned at childhood or school vaccination program.

Percentage Coverage for child immuned at birth by Tetanus vaccination against Tetanus Neonatorum will normally be increased by the number of newborns protected at birth against Tetanus from their mother who received 2 doses or more of Tetanus any time in her life.

Influenza	3,472	60.5	0.2	15.6	-	23.8	()

¹ Sh. Sabah H.C: vaccinations are carried out at this Health Center on behalf of the Public Health Directorate, which include vaccinations to travelers and schools. Those vaccinations carried out for patients within its own catchment area are included under "Health Centers".

² Hospitals & Clinics: include government and private facilities .

³ BCG vaccination, which provides protection against tuberculosis, is given at pre-school age (4-6 years old) to those children who are found to be tuberculin negative .
