 Yes
 No

The German Authorities are also declaring a decrease of the number of new cases.

Joint statement of Federal Institute for Risk Assessment, Federal Office of Consumer Protection and Food safety and Robert Koch Institute

1. BfR, BVL and RKI jointly conclude that the current general recommendation to abstain from eating cucumbers, tomatoes, lettuce in northern parts of Germany does not need to be upheld.
2. In addition to adherence to good hygiene practices, BfR, BVL and RKI recommend abstaining from eating raw sprouts. Households and gastronomic businesses should dispose of any sprouts currently in stock as well as any food items that might have come in contact with these.

3. BfR, BVL and RKI recommend in addition that all food products originating from a distinct producer in Lower Saxony be taken from the market.
4. BfR, BVL and RKI recommend strict adherence to good hygienic practices when handling food or caring for patients.

This notice replaces earlier recommendations issued by BfR and RKI regarding the consumption of cucumbers, tomatoes and lettuce.
