

How to safely transport an active or suspected COVID-19 case

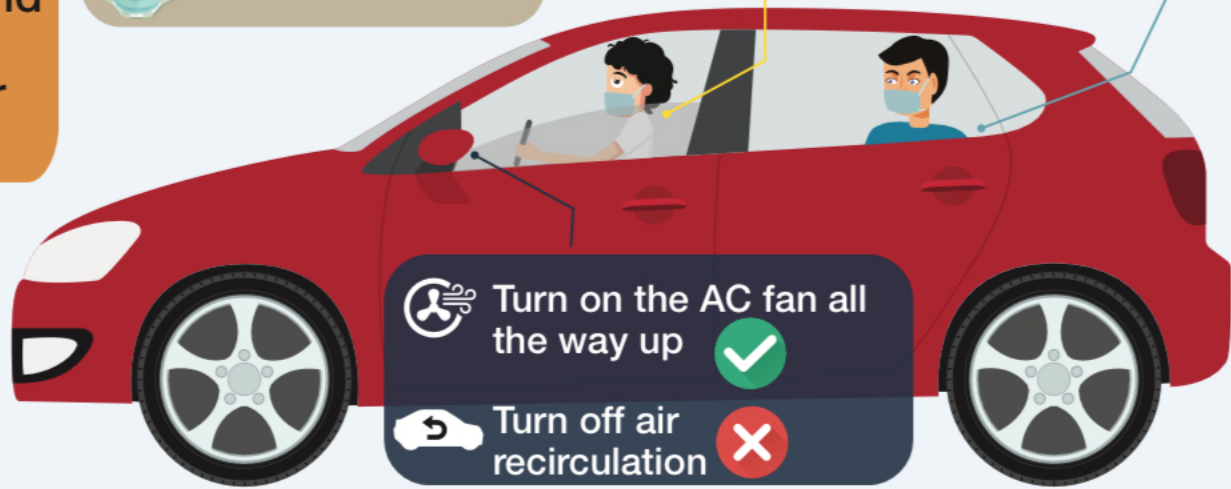

Sit as far apart in the vehicle as possible and use your windows for airflow

✓ The driver and the passenger should wear a face mask

✓ The driver's window should be halfway down

✓ Roll the rear passenger window all the way down

Turn on the AC fan all the way up ✓
Turn off air recirculation ✗

IMPORTANT:

- Drive directly to the destination without making any other stops
- After the passenger leaves the vehicle:
 - Wash your hands for 30 seconds or use hand sanitizer immediately
 - Use an alcohol based disinfectant to wipe down all surfaces within the vehicle
