

Question & Answer

1 What are the mobile testing units?

The mobile testing units are transportable units that organise daily random COVID-19 testing for citizens and residents across the Kingdom. Mobile units are spread out across places visited by the general public, including markets, public places, and local sports clubs for the purpose of mass screening.

2 Why are people being tested randomly?

As part of the Kingdom's comprehensive national efforts to mitigate the spread of COVID-19, random testing is being conducted via the mobile units in order to contribute to monitoring existing asymptomatic cases. This process helps contribute to quick identification and treatment of cases.

3 Who are eligible for random testing?

The categories eligible for random testing are:

1. Residents of areas where a mobile testing unit is located.
2. Visitors of local markets where a mobile testing unit is located.

The categories ineligible for random testing are:

1. Individuals who have been in contact with an active COVID-19 case.
2. Those wishing to conduct pre-travel checks.
3. People who experience and exhibit symptoms of the virus.

4 How can I perform an optional or pre-travel test?

Individuals who would like to conduct an optional or pre-travel COVID-19 test, should do so by visiting a licensed private hospital.
