

Based on a study that took place in the Kingdom of Bahrain

**Dr. Manaf Al Qahtani: Vaccinations have
proven more effective than the clinical trials
against the Covid-19 virus and its variants**

Since January 2021:

**Transmission across all age groups
decreased by **an average of 93%****

From more
than 80,000
active
COVID-19
cases

2%

were vaccinated
individuals

**The prospect of infection decreases
if you are vaccinated:**

By 96%

for those under
the age of 50

By 90%

for those 50 years
of age and over
