

During the coming days

Update precautionary protocol for those who have been in close contact with a positive case:

1

Close contacts of an active case must also quarantine at home as soon as they are informed of their status and activate the quarantine feature on the 'BeAware Bahrain' application

2

Close contact cases **above 50** and those who have **symptoms** will be tested on their first and 10th day of their quarantine

3

Asymptomatic contacts **aged 49 and below** will be tested on the 10th day of their quarantine, **unless symptoms develop.**

Registered contacts will have the option of testing at a private clinic, with a list to be shared soon.
